Jeff Mulkin

Software Engineer

(530) 906-3930 | Roseville, CA | jmulkindev@gmail.com | LinkedIn | Github

EXPERIENCE

Formation Dev | *Front End Engineering Fellow* **|** San Francisco, CA (Remote)

January 2023 - Present

- Selected for highly-competitive Fellowship for personalized coaching from top-tier software engineers.
- Completed intensive training to master computer science fundamentals through coding exercises through independent study, pair programming, and small mentor-led groups.
- Fixed bugs and implemented new production-ready ready features in a large code base including restricting user access to features, correcting design issues, and adding new elements to pages in ReactJS

Executive Advantage Group, Inc. | *Web Developer* **|** Portland, OR (Remote)

April 2022 - Present

- Streamlined the creation process of position-specific executive recruitment websites by creating a template with pre-set CSS/SASS styling to increase recruitment search turnaround times by 75%.
- Designed and developed an automated Python workflow to sift through 100,000+ CSV rows gathered from Lead Generating websites per day; The automation allowed for 100% more sent cold recruitment emails per day, generating 70% more leads compared to the 30% previously.
- Designed custom email templates using HTML and CSS and integrated them into a cold-emailing service for obtaining potential candidates.

CalPro Research, LLC | *Full Stack Engineer* **|** Rocklin, CA (Remote)

January 2019 - May 2020

- Architected a migration of an existing ASP .NET project to the LAMP stack (Linux, Apache, MySQL, PHP) to improve runtime performance for clients, support future customizable modules and improve code readability.
- Designed and implemented reusable UI components using HTML, CSS, and JavaScript.
- Optimized survey generator in PHP, JavaScript, MySQL, reducing runtimes from 8 to 4 seconds.

Entegrity Multimedia | *Full Stack Engineer (Apprentice)* **|** Sacramento, CA

December 2014 - August 2017

- Created websites and WordPress themes for 10+ clients using the LAMP stack.
- Modified existing WordPress plugins to add custom features in order to fit clients' needs.
- Integrated the Google Maps API to several eCommerce websites to show product locations.
